

DEPOT - D-1P

SECRET

15 February 1966

MEMORANDUM FOR: See Distribution

SUBJECT: Project IUDEPOT

1. This memorandum contains a request in paragraph six for response from addressees by 15 March 1966.

2. The A/DDP has approved termination of Project IUDEPOT as now composed by no later than 30 June 1966. The Project now has 65 contract assets of varying ethnic backgrounds, each of whom is now a U.S. citizen. These assets are being held, while not on a full time Agency assignment, on a retainer basis, under U.S. Department of Army cover, for Clandestine Services' contingency employment.

3. The above decision involves termination of the assets maintained by the project. However, certain of these assets may be useful in operations now being conducted or planned by addressees. To this end, pertinent agent data are presented in enclosure. Concurrent with this action, the enclosed roster is also being reviewed in SOD for possible utilization of some in Project IUEWEL (paramilitary assets) and in Project IUGEM (FI, CA and CI assets).

4. For those individuals in whom addressees may have an interest, it is planned that interviews will be arranged for the period 16 March - 1 April 1966. Those assets actually selected by addressees for assignment will be transferred from SOD to the interested Division by 15 April 1966. In the event there is interest by more than one Agency component in a specific asset, such will be resolved separately on an individual basis.

5. Termination of the services of those IUDEPOT assets for whom there are no current needs will be accomplished by 15 May 1966. Arrangements will be made to facilitate retrieval of basic personnel data of such assets should a future need develop.

6. It is requested that action addressees advise the Special Operations Division by 15 March 1966 of the individual assets cited in enclosure for whom there is an employment interest. A negative response, if applicable, is desired by the same date.

7. For additional information pertinent to the foregoing, please contact [ ] (SOD/GB; extension 4115) or [ ] (SOD/GB/IUDEPOT, OX 7-1397).
